TUSHAR SHARMA – FULL-STACK .NET & REACT DEVELOPER

+91 7828515858 | work.tushar1803@gmail.com
LinkedIn: https://www.linkedin.com/in/tushar-18-sharma/

◆ SUMMARY

Full-stack developer with 3+ years of experience specializing in .NET Core, React, and MAUI. Delivered cloud-integrated, scalable web and mobile apps for healthcare and emergency services. Known for performance optimization, user-focused design, and being awarded "Consistent Performer" in 2024.

◆ EXPERIENCE

Software Engineer – Homepage InfoTech Solutions
Indore, India | July 2022 — Present

- Developed scalable 3-tier applications using .NET Core, MVC, ReactJS, and Next.js.
- Integrated Microsoft Azure and CosmosDB to enhance application performance and scalability.
- Designed and optimized backend processes and APIs for mobile and desktop platforms.
- Created robust database schemas in SQL Server for complex incident management systems.
- Awarded "Consistent Performer (2024)" and "Brainiac (2022)" for outstanding contributions.

Java Intern – Ypsilon Solutions
Indore, India | Nov 2021 — May 2022

- Learned and applied OOP principles and Microservices architecture.
- Built modular microservices and API-based systems in Java.
- Strengthened problem-solving skills and understanding of scalable backend design.

◆ EDUCATION

Bachelor of Commerce in (C.S.) – D.A.V.V., Indore
Graduated: June 2023

◆ SKILLS

Backend: C#, .NET Framework, .NET Core, MVC, Web API, Entity Framework, SQL Server, CosmosDB
Frontend: ReactJS, Next.js, JavaScript, jQuery
Mobile: Xamarin.Forms, MAUI
Cloud/DevOps: Microsoft Azure, Azure Cloud Services
Other: RESTful APIs, OAuth, JWT, Unit Testing, Git, Agile, OOP, Problem-solving

◆ PROJECTS

Response Master
Multi-platform fire department system handling U.S. incident data across mobile, desktop, and CAD applications. Integrated billing system calculates incident costs automatically.
Stack: .NET Framework, .NET 6, .NET 8, CosmosDB, Azure, Next.js, SQL Server

EMS (Emergency Medical Services)
System to log and manage injury details during fire-related incidents. Provides third-party APIs for other emergency systems.
Stack: .NET 6, Web API, SQL Server

Project Recovery (Cost Recovery)
Incident billing system using CosmosDB and .NET 8. Three-tier architecture with web UI in Next.js.
Stack: .NET 8, CosmosDB, Next.js, REST APIs

First-Rehab
Doctor-patient web app for UK healthcare clients. Schedules and manages reports with automatic archival.
Stack: .NET Framework, SQL Server, React, Scheduler

OccuHealth
Hospital management system with secure room booking using SQL transaction locks to prevent duplication.
Stack: .NET Framework, SQL Server, LINQ, Azure

OCR
Node.js-powered image-to-text converter enabling fast text extraction from images.
Stack: Node.js

◆ AWARDS & ACHIEVEMENTS

- **Consistent Performer (2024)** – Recognized for continuous high performance in project delivery.
- **Brainiac (2022)** – Awarded within the first 4 months at Homepage InfoTech for innovation and problem-solving.
